SWF As Screensaver

How can we set an SWF file (flash) as a screensaver in Windows XP Pro. Please give me the details for it.

vagish

Use this: <http://www.instantstorm.com/>

Embed flash in an HTML file, and set the HTML as your background (make sure active desktop is enabled)

```
<embed          src="whatever.swf"          width="800"  
height="600"></embed>
```
