

A Linux gives you multiple consoles to work and you can quickly switch between these text consoles by pressing [Alt] + [F1] , [F2] , [F3] , etc. To get back from these terminals, press [Ctrl] + [Alt] + [F7] .

Clear Bash History

Q All of my commands are stored and I use my direction keys to scroll through my bash history. Is there any way to clear them, in a way similar to how I clear my browser cache?

A To clear the cache of your own user account, start a console or a terminal. Go to your home folder, which you should be in by default. Type `rm .bash_history`.

Java Update

Q I have been trying to update Java, as I have a problem with Java-based applications locking up. I have already installed JDK 6 through Sun's Web site, but it still doesn't help.

A You should try updating java-6-sun using the following command.

```
sudo update-java-alternatives -s java-6-sun
```

Disable Ubuntu Updates

Q I like the Ubuntu feature of having constant updates for its applications, but it gets very annoying, so I want it disabled. How do I go about doing that?

A First go to System > Administration > Software Sources. Click on the Updates tab and uncheck the updates you don't want anymore.

Forcibly Delete Files From The Trash Bin?

Q Ubuntu stores all the files in the home folder of each user account. Since 8.04, the trash is kept in `/home/username/.local/share/Trash`. How do I delete them?
