

A Well, the native screen resolution tool reports the wrong frequency with a proprietary NVIDIA driver. Check “NVIDIA-settings” to see the correct resolution and other details.

“Out Of Frequency” in Ubuntu 8

Q I have ATI radeon Xpress 200, which is an onboard graphic card in Intel D101GGC motherboard. I’m using a Viewsonic VA1930WM widescreen monitor. The problem is when I try to install most of the Linux distros like SuSE, Ubuntu and Mint after the boot screen when we press install. The monitor shows an error message as “OUT OF FREQUENCY”.

Vamsikrishna919

`Sudo pig-reconfigure deacon` and select medium or low

In addition, this bulletproof X is very confusing. It leaves hardly anything in `xorg.conf`. But it respects `xorg.conf` though.

Installing 32-bit Skype on 64-bit Ubuntu 7.10

Q Can any one tell me how to install 32-bit Skype version on 64-bit Ubuntu 7.10 version?

kin.vachhani

A `sudo apt-get install ia32-libs lib32asound2`
`wget -O skype-install.deb http://www.skype.com/go/`
`getskype-linux-ubuntu`
`sudo dpkg -i --force-all skype-install.deb;`
