

Pick an active cell, select the entire column, then use [Ctrl] + [Shift] + [I] to select cells that aren't equal to the values in the active cell

With multiple cells selected, select

only the active cell.[Shift] + [Backspace]

With an object selected, select all

objects on a sheet.[Ctrl] + [Shift] + [Space]

Alternate between hiding objects,

displaying objects, and displaying

placeholders for objects.[Ctrl] + [6]

Select the current region around the

active cell (the data area enclosed

by blank rows and blank columns).

In a PivotTable report, select the

entire PivotTable report.[Ctrl] + [Shift] + [*]

Select the array containing the active cell. [Ctrl] + [/]

(Array: Used to build single formulae

that produce multiple results or that

operate on a group of arguments that

are arranged in rows and columns.

An array range shares a common

formula; an array constant is a group

of constants used as an argument.)
