

stopAllSounds

The script to stop all the sounds is

```
stopAllSounds();
```

Escommand

This command helps to play a swf file in full screen mode. With the help of fscommand we can execute some other functions like quit , calling an executable file and many more.

The syntax is like this

```
fscommand("fullscreen", "true");
```

fscommand is available under Global Function > Browser
Network > fscommand

quit It closes the projector

fullscreen	true or false	If you set true then the projector converts in full screen mode and setting the parameter false
------------	---------------	---

allowscale	true or false	False sets the movie to the original size while true sets the scale to the 100% size of the player
------------	---------------	--
