

Workspace with Rulers

You can denote the parameters for the rulers. To do this, go to **Modify > Document**.

Here, the Document Properties dialog box will appear. At the bottom of this dialog box the option Ruler Unit appears. If you click on the arrow near this option, you will see a drop down menu appear. Options like Inches, Inches (decimal), Points, Centimeters, Millimeters and Pixels are available in this drop down menu. Select the desired Ruler Unit.
