

The function of the individual Timeline Effects is to manipulate a graphic or a symbol in a particular manner. The Timeline Effects help in changing the parameters. The leniency in using the Timeline effects helps to achieve the desired effect easily.

All the changes that are made in the settings can be viewed in the Preview Window.

6.1.1 Assistants

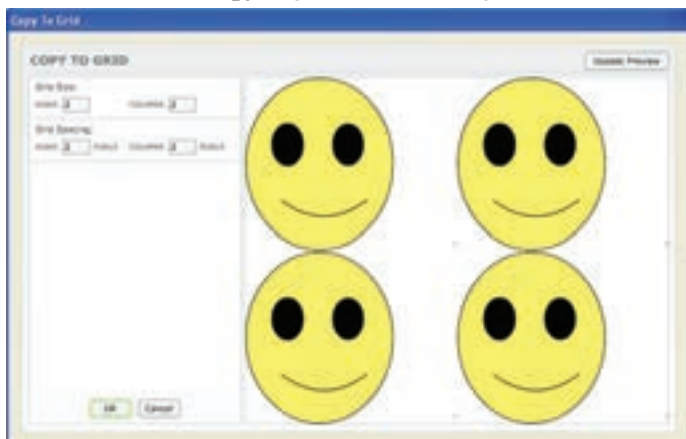

Under Assistants there are two options. It is **Copy to grid** and **Distributed Duplicate**.

Options of Assistants under Timeline Effect

Copy To Grid

The function of **Copy to grid** is to create a grid of the elements.

Copy to Grid dialog box
