

The Welcome Screen of Flash CS3

The **Workspace** is the arrangement of various Flash-elements such as the Tools panel, Control panels, Property inspectors and Windows. We will walk you through what each of these is in later sections.

You can change the workspace layout from the “Workspace” drop-down menu. There are three workspace layouts available to you in Flash CS3: Default, Icons and Text Default, and Icons Only Default. The same options can be seen from the Window menu as well: Window > Workspace.

The Stage and the Off Stage
