Explanation of Intro.xml

This file is very important as it contains the body part and the source of the image associated with the h-text-imag file. The textual part written under the byline tag is written according to the specification mentioned in style.css file. Lastly the image source of the jpeg picture file associated with this .as file is defined with this .xml file

b) Project 2 - A Complete Project on CD Authoring

Developing a training CD on Photoshop

Document properties

Creating a Dynamic Text

- First open a blank flash document. If the document is opened in ActionScript 2 this should be set here)
- Set the size of the document to 800 x 600 pixels. This is shown in the figure below.
- Now click on the text box tool and create a text area
- Set the text area as 'Dynamic Text'
- Now type 'Welcome to Photoshop Guide' within this text area
- Select the text tool again and create another bigger text area
- Set the text type as 'Dynamic Text'
