

- Drag the new movie clip from the Library panel.

- Now give it an instance name as `ice_bit`.
- Select first frame of 'Scene 1' and add these code to Actions panel.

```
speed1 = .9;
mw = 550;
mh = 400;
icedrop = 50;
function randRange(min,
max) {
    var randomNum =
```

```
Math.round(Math.random()*(max-min))+min;
    return randomNum;
}
setInterval(CursorMovement, 40);
function CursorMovement() {
    ice_bit._x = speed1*(ice_bit._x-
_xmouse)+_xmouse;
    interval = (ice_bit._x/mw*6);
}
function icefall() {
    i++;
    duplicateMovieClip(ice, ["ice"+i], i); //
this helps to increase the number of snow flakes
}
setInterval(icefall, icedrop);
```
