

- Again the same dialogue box appears.
- Now in this case give it a name as “Star1_mc” and convert it to movie clip.
- Click OK.

- Now convert it to Graphics.
- Name it as “Star_gr”.
- Click on OK.

- Now double click on the star symbol to enter inside the movie clip.
- Now select the star again and then press [F8].

- Double-click on it to enter inside the 2nd movie clip.
- Here select the star and press [F8].

- Insert a Keyframe in frame 15 and move the star a bit.

- Add this script.
`stop();`

- Also change the Alpha value of the star to 0 in the 15th frame.
- Now create a motion Tween between frames 1 and 15.
- Now select the last Key Frame and then right click on your mouse and choose Actions.
