

- Open a Flash Document. If the new document needs to be opened in Flash Actionsript 2.0, it should be set here
- Right Click on the 1st key frame
- Choose Actions
- Now type the following code

```
createTextField("greet",  
0, 0, 0, 100, 100);  
greet.text = "Hello  
World";
```

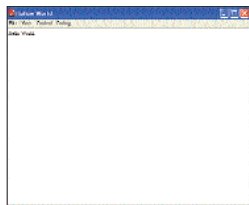

- With this code a text area will be created with depth 0 and position (0,0)
- The dimension of the created Text field will be 100,100 (pixels)
- In that text field the string Hello World will be displayed
- Press [Ctrl] + [Enter] to run the application
