#include "h-text-image.as"  
#include "h-text-img5.as"
```

The script associated with this fla file includes two action script files which are h-text-image.as and h-text-img1.as

Explanation of action.as**Script and its explanation**

```
var myxml:XML = new XML();
```

The first line of the code creates an xml object named myxml. This is done by using a new method.

```
myxml.ignoreWhite = true;
```

This line of code defines that the xml object, i.e., myxml, that is created should ignore white spaces in the xml code.
