

available easily by the Linux community all over the internet, and are pretty easy to follow.

9.2 Using Dosbox to play DOS games

Dosbox is the DOS emulator of choice for many enthusiasts who like to play the old DOS games like ~Dave or ~Skyroads. Dosbox is crossplatform, and works on Linux apart from BeOS and Mac OS X. To get the debian installer for Dosbox, go to <http://tinyurl.com/dosboxdeb> and get the RPM installation from <http://tinyurl.com/dos>
