

name (more than 8 characters). So rename a folder like 'My Games' to 'MyGame'. Also make sure you have not entered Mount C `~/home/username/games`, because `~` stands for `/home/username`. Another thing to check is that you have to get the capitalisations exactly right. So, if the folder name is `MyGames`, entering `mygames` will not work.

If you have entered the address properly, you should get a message like `Drive C is mounted as local directory /home/username/games`. Now type:

`C:`

This changes the drive from `Z:` to the mounted `C:`. The directory structure here is the same as the directories you can see in `/home/username/games`. To go to a specific game folder, type:

`CD ddavevga`

Now either type `dave.exe`, or just `dave`.

That is it. You can now start playing the game.

## 9.3 Using a NES emulator to play NES Roms

A NES emulator mimicks the Nintendo Entertainment System on your machine to play what are called NES Roms, which are the old
