

pared to other frameworks are its features for creating classes, and extensions to DOM. script.aculo.us adds animation and effect features to Prototype.

● The YahooUI library

This is a free open source library provided by Yahoo! for developers. Furthermore, it is under a non-restrictive licence, so you are free to modify and distribute it. It's very powerful, and supports many features. Similar to other libraries, it is also quite modularised.

unreadable	address	city	state	amount	active	colors	last_login
	1236 Some Street	San Francisco	CA	5	yes	red	04/18/2007
