

```

</select></p>
<table width="500" border="0" cellpadding="0" cellspacing="0"
id="movies">
<tr>
<th scope="col">Rank</th>
<th scope="col">Name</th>
<th scope="col">Earning</th>
</tr>
</table>
<table class="navmenu">
<tr>
<td onclick="displayPage(0)">first</td>
<td onclick="gotoPage(-1)">previous</td>
<td onclick="gotoPage(1)">next</td>
<td onclick="displayPage(-1)">last</td>
</tr>
</table>
<table class="navmenu" id="navMenu">
<tr>
<td>
</td>
</tr>
</table>
</body>
</html>

```

This is the HTML code with minor changes to better accommodate the CSS styles.

No of items to display per page:

Rank	Name	Earning
1	Titanic	600788188
2	STAR WARS (1977)	460988007
3	Star Wars: Episode I: The Phantom Menace	431088295
4	E.T. THE EXTRA-TERRESTRIAL (1982)	399004510
5	Jurassic Park	357067947

Just adding some attitude!

In our final act, we will now add functionality similar to Google Suggest in our app. For those
