

● Ext

This is a powerful library for building rich GUIs. It uses AJAX in its core for data communication, synchronisation, etc. The latest version, according to their web site, provides widgets for:

- Text field and text area input controls
- Date fields with a pop-up date-picker
- Numeric fields
- List box and combo boxes
- Radio and checkbox controls
- HTML editor control
- Grid control
- Tree control
- Tab panels
- Toolbars
- Desktop-application-style menus
- Region panels to allow a form to be divided into multiple sub-sections
- Sliders
