

Once again you may configure the command you have selected.

Next you'll see the format options. There is a wide option of file formats to choose from. Select format options for the audio files. We chose .MP3 and now in the MP3 Encoder Settings you can further customise the output files as shown:

mp3

encoding audio

You may also select an output folder if you so desire. Note that if the file format is the same as the original files and you do not choose an output folder the files in the original folder will be overwritten.
