

the icon in the system tray and select Options.

Along with that you can also change the effect from Flip and select the other two choices, i.e. Grid and Wave Flip. However, in our opinion the standard Flip is much better.

Customise the Shock Aero 3D options

Making a new Aero effect after customising

If you don't like the standard camera view of the Flip effect you can change it to suit your needs. You can also add some background effects to add to the whole 3D effect. But by adding these effects, more RAM will be utilised which might
