

not. That is the right time to make a jump, before specialisation sets in and hence one's skill remains suited to the particular industry.

Schools/certifications to consider:

- Centre for Electronics Design and Technology
Indian Institute of Sciences
Bangalore
25 courses in different aspects of Embedded Design
- Visvesvaraya National Institute of Technology
Nagpur
Master of Technology (MTech)
Electronic Embedded System (Two Year Course)
- Sastra University
Tirumalaisamudram, Thanjavur, Tamil Nadu
M.E. Embedded Systems Technology (Two Year Course)
- Anna University
Chennai
M.E. Embedded Systems Technologies
- Indian Institute of Technology
Delhi
Certificate course on embedded systems and applications in telecom and multimedia (one- month course for engineering graduates)
- Centre for Development of Advanced Computing
Hyderabad
Full-time diploma in embedded systems design (Five- month course for Engineering Graduates in Specific Fields)

Please note: This list is not exhaustive and is compiled based on discussions of experts across industries
