## 2.6 Restricting children to safe areas

Children working off the same computer or connecting to the internet the first time, especially in this age of net crimes, are always at risk. However, explicit content and malware also pose a significant threat for a child who wouldn't be able to deal with them. There are several parental controls embedded within Windows. You have the option of turning them on or off, as well as collecting information about computer usage by enabling Activity Reporting. First go to the Control Panel and click on **User Accounts>Parental Controls**. You can apply Parental Controls on pre-existing, non-administrator account or create a new one for the purpose. The different control options

With Net Nanny, you can keep a tab on what kids can see online
