

3 Cyber Cafes

3.1 Elementary Precautions

Cyber cafes are very popular in India. The technology revolution ensures that everyone has a use for the internet. Computer costs and casual use have since facilitated the growth of cyber cafes. People mainly use cyber cafes for browsing the internet, checking their mail and chatting.

The first important rule is to never tell the cyber cafe owner (or anyone else for that matter) your email ID and password to check your mail. This may sound dumb but keep in mind that many old folks and small kids have no idea about the risks of spam and information theft. Email IDs and passwords should

Turn off the autocomplete option when browsing on public computers
