

Configuring resolutions

Removing the ekiga package

booting options) as well as the usplash boot screen (the image shown after selecting boot options.) To generate a usplash image, click the **Generate** button. Select the image you would like (PNG) and select where to save the library file. Reconstructor will generate the library and copy it to the correct directories.

For lots of free Gnome themes, splash screens, wallpapers, fonts, icons and more, check out www.gnome-look.org.
