

**Turn discovery on**

that you want to use.

The Options tab in Bluetooth Devices provides the options that control how devices discover and connect to your computer. The main option is “Turn discovery on”. This option lets devices discover your computer so that you can make a connection.

Other options on this tab include the following:

- Allow Bluetooth devices to connect to this computer. If it is cleared then others cannot connect to your machine.
- Alert me when a new Bluetooth device wants to connect. This gives you an alert when another device tries to connect to you (just in case you want to block it). If cleared, no
