

3 Mobile Phone Models

Dual key-pad

accommodate the alphanumeric keypad that makes using the device as a phone easier.

- Four-row side-slide QWERTY keyboard with a standard alphanumeric keypad.
- 369 MHz ARM11 CPU running a Symbian OS with S60 3.2 UI.
- 3.2 megapixel auto focus camera with a dedicated shutter key, geotagging and VGA@30fps video recording
- Office document editor, smart dialling and excellent e-mail setup wizard.
- Steel battery cover makes the phone look elegant.

Main disadvantages

- When you look at its hardware and features, its price-point is rather steep.
- Battery life is not good such as other Nokia E series phones.
- D-pad is tiny compared to even Nokia-s mid-range phones. It is very uncomfortable to work with.
- Small screen to accommodate an extra keyboard can be a turn-off for many users.
- Estimated street price: Rs. 23,000.
