

AUTODESK MAYA

A number of people use Maya, including people who want to just know about 3D computer graphics (CG), 2D artists who create caricature animation for film and television, artists who make high dynamic landscapes and those who work on animated short movies. Every CG artist has a basic understanding of this software.

1.1 3D Modelling

3D modelling is all about creating models of objects or illustrations, which can be defined from all angles. The best way to describe this is by modelling an object from clay or wood, instead of software used for creating three-
