

2 Installation

Customize Installation

Snow Leopard allows you to customize your installation by letting you select the facilities you want.

In case you are not very finicky about the process, just click on Restore Defaults, and move ahead. You may however customise the following :

- Printers
- Fonts
- Languages
- X11
- Rosetta
- QuickTime

You may obviously not unselect the “Essential System Software” – which presents the core of the operating system.

Printer support

The printer support for Snow Leopard is easier than that of previous models. For example, the installer automatically figures out what models have been
