

7.3 Styling the Profile Boxes

To add style for the profile boxes you create using the above methods, create a new file called `profile.css` in the CSS directory and add the following source code.

```
.profileContent { margin-top:-12px; text-align:center;}
.sendFeedback { text-align:center;}
.sendTitle {font-weight: bold;}
#FeedbackTable .textInput {width: 200px;}
.categories { padding-bottom: 5px; }
.categoryTitle { height:30px; font-weight:bold; }
.category { float:left; text-align:center; margin:3px;
width:43px;
height:65px; padding:5px; }
.categoryImg { width:24px; height:24px;}
.wide .banner { width:380px; height:45px; }
.wide .category { width:108px; }
.wide .categoryTitle { height:20px;}
.narrow .banner { width:193px; height:23px; }
.main .banner { width:193px; height:23px;}
```

7.4 Adding the Profile Boxes

Profile boxes do not get automatically added to a user profile. The user must manually choose to add one to his profile by clicking on a button.

7.4.1 Displaying Add to Profile Buttons in FBML Canvas Pages

Displaying the Add to Profile button is very simple for an FBML canvas page. Just add the following code to the `renderPage()` function in `index.php`, after the banner in the header block. The `<fb:if-section-not-added section='profile'>` tag makes sure Facebook only renders the inside FBML if the user hasn't added the profile box yet. The `<fb:addsection-button section='profile' />` tag actually renders the button. All of this is enclosed in a `<div>` so that we can position it where we want on the page using CSS.

```
index.php
<div class='banner'
style='background: url(".LOCAL_APP_URL."/img/banner.
png) no-repeat;' >
<div id='buttons' class='clearfix' >
```
