

10 Additional Resources

Now, that you've started and built your application, there will be certain problems you will run into while implanting the various features we talked about. So, what do you do? The single best resource for these types of problems is the Facebook Developers forum at <http://forum.developers.facebook.com/>. There's also a channel on freenode (#Facebook) if you're old-school and more comfortable on IRC. This is at times the faster way to get an answer to a specific question. You can also check out the different Facebook developer groups (http://wiki.developers.facebook.com/index.php/Local_Developer_Group).

Besides these are several good references for Facebook Developers:

- All Facebook. <http://allfacebook.com>
- Developer News. <http://developers.facebook.com/news.php>
- Facebook News. <http://blog.facebook.com/blog.php>
- Inside Facebook. www.insidefacebook.com
