

values from left to right we have $200 + 1 + 10 + 338 + 10 + 1 + 200$, equaling 760 pixels.

```
/* Content */
#content {
width:338px;
margin-left:200px;
margin-right:200px;
margin-bottom:10px;
```

Final complete three column layout

```
padding:10px;
border:1px solid #000;
}
```

From this, we know that each sidebar has a maximum allowance of 180 pixels. The margins suggest 200 pixels are allowed, but this includes an extra 20 pixels either side of the content ID to space the columns apart. Here we need to get really mathematical. Each sidebar must be no wider than 180 pixels, including padding and border values. Subtracting the border and padding values from 180 gives us a width value of 158 pixels for each sidebar ($180 - 1 - 10 - 1 - 10 = 158$).

```
/* Sidebar A */
#sidebar_a {
```
