

```
ul {  
  list-style-type:none;  
  margin:0;  
  padding:0;  
  width:160px;  
}
```

6.3.4 Final touches

Now to refine the display a little more, font values are added with a shorthand declaration, and the unordered list is given a border, a margin, and 2 pixels of padding to create whitespace around the buttons.

```
ul {  
  list-style-type:none;  
  margin:5px;  
  padding:2px;  
  border:1px solid #333;  
  width:160px;  
  font: bold 12px 'Lucida Grande', Verdana, sans-serif;  
}  
li {  
  background: #DDD;  
  margin: 0;  
  padding: 2px 10px;  
  border-left: 1px solid #fff;  
  border-top: 1px solid #fff;  
  border-right: 1px solid #666;  
  border-bottom: 1px solid #aaa  
}
```

This might be a good point to take what you have learned about navigation lists thus far and experiment with your own border, background, and margin values to personalize your list and get a feel for this vital element of CSS-based design.

6.4 The ordered list

The ordered list is a convenient way to mark up a list of items with each preceded by a number. HTML makes this possible with the `<ol>` element. Let's again take the drinks list and this time place it inside an ordered list.
