

Place the following (X)HTML in a new file called floats.html:

```
<html>
<head>
<title>Chapter 10: Layout Basics</title>
<link rel='stylesheet' media="screen" type='text/css'
href='float.css' />
</head>
<body>
<div id="container">
<h2>Introducing the band</h2>
</div>
</body>
</html>
```

Save the file. Note that an external style sheet called float.css is referenced in the <head> element of the document. Create float.css and paste the following code into it:

```
/* Specify blanket rules for all elements */
body {
font-size:80%;
font-family:'Lucida Grande',Verdana,sans-serif;
margin:10px;
background-color:#CCC;
}
/* Container for all page content */
#container {
padding:10px;
border:1px solid #000;
background-color:#FFF;
}
/* Rules for headings */
h1 {
font-size:150%;
}
h2 {
font-size:140%;
}
h3 {
font-size:120%;
```
