

```
border:1px solid #000;  
}
```

The box is still floated left, and that the paragraph is now cleared left. This will force the paragraph to begin on a new line underneath the box .

8.2.2 clear:right

Specifying `clear:right` will ensure that the element is moved below the bottom outer edge of any right-floated elements directly above. Let's examine another example built upon the previous one. In the CSS, all that is needed is to change the instances of left to right.

```
p {  
clear:right;  
font-size:100%;  
line-height:150%;  
}
```

The gray box is floated right

```
.floatbox {  
float:right;  
width:60px;  
height:60px;  
background-color:#999;  
border:1px solid #000;  
}
```

Failing to change the paragraph's clear value from left to right would
