

```
img {  
position:fixed;  
left:400px;  
}
```

As a result of this change, the image's position will appear to be the same as in the absolutely positioned example. The real surprise comes when you scroll the .The image remains in view always, fixed 400px from the left of the browser window. This technique is perfect for navigation elements or forms that need to appear in view no matter how far the user scrolls down the web page.
