

sites, but just a way to make do.

Apart from these, there are more than 20 multimedia CMSs for video sites such as Ostube, ClipBucket, ClipShare, VidiScript and ShareMixer.

WordPress is an open source CMC generally used for blogging and publishing your thoughts and ideas. It has a very simple user interface. Sites such as icondock, Nikonfestival, creativeawards and good use WordPress as a CMS. Installing WordPress is easy to use, unlike Joomla that takes a lot of time to install.

Photo heavy sites can make use of a number of CMSs such as gallery2, CMSMS (CMS Made Simple). Even Drupal and Joomla can be used. WordPress also has many plug-ins for photo gallery such as Fotobook, NextGen gallery and Yet another photoblog.

3.2.3 Simple branding site with contact and feedback forms

WordPress is considered to be user friendly. Even beginners find it easy to work with WordPress. It is a very simple site CMS mainly used for blogging. It can be used for building companies' official web sites or for feedback forms. However it isn't easy to customise WordPress, it is not developer friendly. But the best part is it is so easy and simple to use that the above flaw can be ignored.
