

A. We entered the Web Services Industry in 2001. Initially, we used to provide Development Services and Domains/Hosting as an add-on service. Through the course of time, we realized that there was strong demand for plain vanilla Domain Name and Hosting solutions, and being pure standalone Products, we were able to position them better in the market. In 2002, we started dealing with ResellerClub for Domain Names. At this moment, our Products suite comprises of domain names, Linux and Windows hosting, Email hosting, digital certificates, payment gateway services, SMS Gateway Solutions and CMS/e-commerce based web development solutions. In the future, we see strong demand for Digital Certificates and VPS Solutions apart from the ever increasing market for Domain Names and Hosting Products. The primary reasons for this are – more awareness amongst people, need in the market and manifold increase in 2nd time buyers of Web Services.

We give full control of Domain Names to our Customers and we have never tried to throw any cages on our Customers' Products. We have realized that more the freedom you provide, the more likely the Customer is to retain our services

Q. Could you tell us some interesting stories or anecdotes about your company?

A Well, at times we have been asked by Customers as to how we are able to sell so cheap and provide quality services. And do we make any money at all :)

Q. What do you believe is your secret to success and why do customers prefer Pack Web Hosting?

A. To put it point-wise:

We have tried to remain as competitive as we can.

- Have ensured transparency in Customer dealings. We tell our Customers that we deal with ResellerClub and we are their Resellers.
- We give full control of Domain Names to our Customers and we have never tried to throw any cages on our Customers' Products. We have realized that more the freedom you provide, the more likely the Customer is to retain our services.
- We provide quality Hosting Services with the highest possible support levels.

Q. Tell us a little about doing business in Chandigarh? What are the most unique aspects of the market?

A. Fortunately for us, Chandigarh is situated at a strategic location where
