

hosting account is set up instantly and ready to be used with its own control panel (cPanel). Customers will get their own user control panels (cPanel) which will allow them to create and modify their websites, control sub domains, emails, passwords, install scripts etc without the active need of the reseller.

From most of the online feedback about this service provider one thing that remained common was HostGator's very helpful customer service. There is a 24/7/365 support in the form of live chat, phone support or the good old electronic mail ticketing system

Cpanel is one of the better control panels in the industry and it allows the end user to install dozens of scripts. The package from HostGator also includes Fantastico which helps you with auto-installation.

It supports a variety of programming languages like PHP5, Ruby on Rails, Perl, Python, CGI etc.

Scripts supported by Fantastico :

- **Blogs:** b2, b2evolution, Nucleus, pMachine Free, WordPress
- **Portals/CMS:** Drupal, Geeklog, PHP-Nuke, phpWebSite, Post-Nuke, Siteframe, Xoops
