

JustHost

Website: www.justhost.com

Alexa Traffic Rank: 2,263

Just like HostGator, JustHost too has well defined reseller plans. It starts from as low as \$20 a month to \$90 a month for the Platinum plan. It makes sense for a beginner to start small and later on upgrade to the Platinum plans when he has established himself as a reseller. Also on offer is the cPanel control panel, free domain for life, a website builder and templates. The automated billing system is offered for free. Domain name registration is free with each plan.

Your customers also get their very own cPanel to control their website along with website statistics like AWStats, Webalizer, Referrer
