among others. Fantastico as discussed above is also freely offered. There is a free demo of WHMCS which is a billing and client management system where you can login as a client or the admin to have a feel of its user interface.

One clincher for this site is its Anytime money back guarantee, something which may seem too good to be true for disgruntled users. But the website advertises it under the guarantees tab.

User Friendliness:

The website is somewhat reminiscent of Hostgator in terms of its plans layout. It is quite user friendly in the sense that you know for sure what your package includes. Also the payment page does not offer any unwanted 'plans' to save money. It is a clean straightforward registration.

The features tab gives an interesting lowdown on all the various kinds of features on offer under the e-commerce, CMS, multimedia, technology, site promotion and other such parameters.

Payment Methods: PayPal, Credit card.

Reseller Club
