

phpCOIN, Open-Realty, Moodle

The service provider also supports a range of programming languages like Python, PHP, Perl, FrontPage Server Extensions, Ruby on Rails, ASP.net.

SiteBuilder kit is offered free with all the plans and it is an easy way to use web-based tools which are easy to grasp by those who have no previous website development experience as well as the more advanced web designers and developers. There is a 5 step wizard that guides you to creating, managing and publishing your own website without any HTML skills required in as little as 15 minutes promises the site.

It also offers a 30-day money back guarantee and a 180-day risk free option which allows you to cancel your account regardless of commitment and refund all unused hosting fees. The money back schemes are not available for SSL certificates and domain names but you can continue to use them with another web hosting service.

User Friendliness:

The website is quite user friendly in the sense that the detailing related to each plan is well laid out. The naming of plans after coffee types is an interesting touch and my help in easy recall for some. The home page has a brief overview of all the economy plans which gives you a quick glance of the services offered. 🍷
