

downloads/82)

This plugin is a document management system for Joomla. Its core feature is that it supports multiple categories and subcategories along with giving your users to edit, upload or download documents.

For videos, just use AllVideos

Akeeba Backup (extensions.joomla.org/extensions/access-a-security/backup/1606)

Akeeba Backup Core provides backup component and is open source. Its sole purpose is to create site backup which can be restored on any Joomla based server. The main advantage of Akeeba is that it creates the entire site backup in a single archive form. To avoid server time outs the backup process is AJAX-powered.
