

printers. Windows Vista was all about improving memory management, networking, process management, security, maintaining the compatibility with applications, etc. even though it quite didn't live up to the promise. Windows 7 builds on that foundation and delivers a better experience to users. If you've been stuck in a time loop using Windows XP or Windows Vista, which is just plain annoying for most people, you can finally break free. Windows 7 is more than what Vista should have been - it's where Microsoft needed to go.
