

Teach yourself how to talk to your computer

Windows comes with a speech training tutorial to help teach you the commands used with Speech Recognition. The tutorial takes about 45 minutes to complete. Follow the steps after clicking on Take Speech Tutorial in the Windows Speech Recognition window.

Train your computer to recognise your better using Voice Training.

Train your computer to recognize your speech

Speech Recognition associates a unique voice profile to your User Account to recognise your voice and spoken commands. As you use Speech Recognition, your voice profile gets more detailed, which should improve your computer's ability to understand you.

Open Speech Recognition and Click on Train your computer to better understand you.

It will ask you to speak default text to calibrate itself to your voice.
