

of backing up your files to a network. In all, its more flexible and easier to manage.

7.1.2 How to use Backup in Windows 7?

Open Backup and Restore by going to Control Panel and selecting "view Small/Large Icons" at the top right corner or from the "System and Security" link in the standard menu. The left pane of Backup and Restore utility has two links to "Create an image backup" and "Create a System Recovery Disc" while the right pane will display different options regarding backup and restoring.
