

on this screen and tap Advanced to configure Advanced Wi-Fi settings.

- **Wi-Fi:** Check to turn on Wi-Fi so you can connect to Wi-Fi networks. When connected to a network, displays the network's name.
- **Network notification:** Check to receive a notification when an open Wi-Fi network becomes available.
- **Wi-Fi networks:** Displays a list of Wi-Fi networks you've previously configured and those detected when the phone last scanned for Wi-Fi networks.
- **Add Wi-Fi network:** Opens a dialog where you can add a Wi-Fi network by entering its SSID (the name it broadcasts) and security type.

Use Wi-Fi settings to manage access points

5.2.2 Advanced Wi-Fi settings screen

- **Wi-Fi sleep policy:** Opens a dialog where you can set whether and when the Wi-Fi radio disconnects. Disabling sleep uses more battery power.
- **MAC address:** The Media Access Control (MAC) address of your phone when connecting to Wi-Fi networks.
- **IP address:** The Internet Protocol (IP) address assigned to the phone by the Wi-Fi network you are connected to (unless you used the IP settings to assign it a static IP address).
- **IP settings:** If you check USE STATIC IP, you can use the IP settings to enter an IP address and other network settings for your phone manually, rather than using the DHCP protocol to obtain network settings from the Wi-Fi network itself.

5.2.3 Bluetooth settings screen

- **Bluetooth:** Check to turn on Bluetooth so you can connect to Bluetooth devices.
- **Device name:** Opens a dialog where you can give your phone a name that
