

- **Running services:** Opens a list of applications, processes, and services, that are currently running or are cached.
- **Storage use:** Opens a list of all applications on your phone with information about the storage they use.
- **Battery use:** Opens a list of the applications that have used battery power since you last charged your phone.

5.7.2 Development screen

The Development screen contains settings that are useful for developing Android applications. For full information, including documentation of the Android APIs and development tools, see the Android developer web site (<http://developer.android.com>).

Android lets you change font sizes as well as animated transitions

- **USB debugging:** Check to permit debugging tools on a computer to communicate with your phone via a USB connection.
- **Stay awake:** Check to prevent the screen from dimming and locking when the phone is connected to a charger or to a USB device that provides power. Don't use this setting with a static image on the phone for long
