

- **SafeSearch:** Opens a dialog where you can set whether you want Google SafeSearch filtering to block some results when you use Google search by voice: Block no search results (off), only explicit or offensive images (moderate), or both explicit or offensive text and images (strict).
- **Block offensive words:** When unchecked, Google voice recognition will recognize and transcribe words many people consider offensive, when you enter text by speaking. When checked, Google voice recognition replaces those words in transcriptions with a placeholder comprised of hash symbols (#).

5.12.2 Text-to-Speech settings screen

If you don't have speech synthesizer data installed, only the Install voice data setting is available.

- **Listen to an example:** Plays a brief sample of the speech synthesizer, using your current settings.
- **Always use my settings:** Check to use the settings on this screen in place of speech synthesizer settings available in other applications.
- **Default engine:** Opens a dialog where you can set the text-to-speech application you want to use, if you have more than one installed.
- **Install voice data:** If your phone does not have speech synthesizer data installed, connects to Android Market and guides you through the process of downloading and installing the data. This setting is not available if the data is already installed.
- **Speech rate:** Opens a dialog where you can select how quickly you want the synthesizer to speak.
- **Language:** Opens a dialog where you can select the language of the text you want the synthesizer to read. This is particularly useful in combination with the Always Use My Settings setting, to ensure that text is spoken correctly in a variety of applications.
- **Engines:** Lists the text-to-speech engines installed on your phone. Touch one to view or change its settings.

5.13 Accessibility settings

You use the Accessibility settings to configure any accessibility plug-ins you have installed on your phone.

- **Accessibility:** Check to enable all installed accessibility plug-ins.
- **KickBack:** Check to have the phone vibrate briefly as feedback as you navigate the user interface, press buttons, and so on.
