

[A]: Reply-all to current message (works only while inside the message)

[Y]: Archive message (works from within message or while on main inbox list)

Menu + [U]: Refresh inbox

Menu + [C]: Compose new e-mail

Enter: Open an e-mail (from the main inbox list)

[Alt] + Trackball-Up: Jump to top of inbox

[Alt] + Trackball-Down: Jump to bottom of inbox

10.5.3 Apps

Search + [B]: Open browser

Search + [C]: Open contacts

Search + [E]: Open e-mail

Search + [G]: Open Gmail

Search + [I]: Open calendar

Search + [M]: Open maps

Search + [P]: Open music

Search + [S]: Open text messaging

Search + [Y]: Open YouTube

You can also customise keyboard shortcuts for applications: Just go into "Applications" off the main system settings menu, then select "Quick Launch." From there, you can change any of the above app-controlling hotkeys and add in your own.

10.6 Optimise your home screen

To add a widget, hold your finger on any open space, and then select 'Widgets' from the pop-up menu.1. Make the most of your space by using widgets--dynamic programs that operate right on your home screen. Simply hold your finger on any open space, and then select Widgets from the pop-up menu. Widgets come in a huge variety of sizes and functions, so search the Android Market to find what works for you.

You can easily customise your home screen in Android
