

1 Android

Android is Google's mobile operating system, which was initially developed by Android Inc. but later acquired by Google in 2005. It is based upon a modified version of the Linux kernel.

It is currently the world's best-selling smartphone platform, dethroning Nokia's Symbian from the 10 year top position, according to Canalys. In India, it has a strong presence with a plethora of options from most major companies. Some of the popular handsets with the current prices are listed below:

Motorola
